# ABOUT US

- \* In 2012 we started providing electrical contracting services in Erbil, today we have presence not just in Erbil but all around the Iraq where we have completed many project. we have grown to take on and deliver many projects.
- \* Thanks to our team's spirit, work ethos and business ethics we have been able to always satisfy our customers with the work we deliver. AL-WALA ELECTRIC has successfully completed many large scale electrical and automation services to industries such as, hotels, business centres, hospitals and aims to continue to work in these areas.

# VISION

- \* Adhering to the sectors international standards we aim to deliver projects which meet our customer's satisfaction whilst ensuring we are adding value to the national economy and providing a work place where employees feel valued

# MISION

- \* To provide our customers with technical, innovative and commercial solutions whilst complying with International Standards as well as delivering projects efficiently, on time and in a cost effective manner.

# ENGINEERING

- \* Our company started its operations with a view to become successful, both domestically and internationally, by developing a culture whereby every employee will naturally work towards a healthy and productive methodologies for achieving individual and company goals in the current market conditions. The company was founded in 2012 in Erbil.
- \* Our aim is to make good use of our advancements in the world's energy, water and underground services to help eliminate energy problems and raise the standard and comfort of living, while always adhering to national and international standards for energy production and distribution. Our experienced team have helped built trust with our customers and investors in the field of electromechanical engineering.
- \* We strive to meet the design and requirements of our customers by closely working with them to find the most suitable solution. We put great emphasis on delivering error free solutions in a timely manner and without compromising on the quality or the service. As a company we always look to incorporate the latest technologies, such as the Internet of Things (IOT) and Artificial Intelligence (AI) however we never deviate from our core value of delivering services to meet our customers' satisfaction and continue to exceed their expectation.
- \* Using the current synergy AL-WALA ELECTRIC will continue to offer the most suitable solutions in the field of electromechanical services. We would like to thank all of the companies we have worked with and our employees for their hard work and hope to continue to work together for the foreseeable future.

# AUTOMATION

- Equipped with expert engineering staff, AL-WALA ELECTRIC provides the latest in lighting automation, intelligent building systems, process automation and data collection for our customers. We deliver end to end simple and intelligent systems to our customers in a complete package. For each project we have a cost effective, expandable and simple solution which is tailored to specific needs and requirements. Our priority is to ensure that customers can use our automation and data collection propositions to make value added changes, which is driven by our ambition to ensure customers receive the right choice at the best quality.

# SERVICES

\* We provide turnkey projects with system solutions for electrification of industrial facilities, superstructure and infrastructure projects.

## Electrical Systems

- Power Transmission and Distribution
- Power Generation
- Process and Energy Automation
- MV / LV Distribution System
- Earthing Systems
- Lighting and Lighting Automation Systems
- Fire Detection Systems
- TV / Audio Systems
- Telephone and Data Systems
- Security Systems
- CCTV Systems
- Vehicle and Human Counting Systems (For Shopping Malls)
- Floor Heating Systems
- BMS (Building Management Systems)
- Home Automation Systems

# SERVICES

- **Industrial Plants**
- Waste / Clean Water Treatment Plants
- Petroleum and Natural Gas Facilities
- Transportation Facilities
- Chemical, Food, Pharmaceutical Plants
- Mining Facilities
- Production Facilities
- Integrated Health Facilities
- Utility Energy Centers
- Co-generation distribution networks
- Water, ground or air source heat pump systems
- Solar and Wind Power Plants
- HEPP (Hydroelectric Power Plant)
- Transformer Substations
